

NET-VISION8CARD

Carte réseau - passerelle IoT. Supervision de l’ASI et accès services digitaux

Strong points

- Simplified equipment management
- Secure access and encrypted connections
- Access to digital services

Access to resources (ex: manuals)

Net Vision is a communication interface designed for enterprise networks that enables a direct and secure connection between the UPS and the Ethernet network. This connection provides a wide range of network services, including UPS monitoring, event notifications, the automatic shutdown of servers powered by the UPS and many other services. Net Vision also serves as an IoT gateway, granting access to a comprehensive array of digital services. It is compatible with all UPS ranges equipped with a communication slot.
